Program Evaluation

MSHL is committed to providing the best possible activities, programs, and services. To this end, we will incorporate an evaluation component to our activities, programs, and services to determine a program's impact. This evaluation may be conducted at the end of the activity or program cycle and can be tailored to the parameters of specific activity, program, or service being evaluated. Each staff member is responsible for creating, conducting, collecting, compiling, and reporting the results of these questionnaires in a timely manner.

Additionally, as participant feedback is critical to providing relevant activities and programs, an annual MSHL General Evaluation and Feedback Form will be provided to all members. This form will seek to elicit evaluation on current activities, programs, and services from our active participants while encouraging feedback of ideas for additional activities, programs, and services that are desired.

All evaluations and feedback received will be integrated into the planning and/or decision regarding the continuation of the specific activities, programs, and services.
